

My personal sales-route planner

With **portatour® for Dynamics® CRM**,
discover the future of fully automated
sales-route planning for your field sales
force, consultants, and service team
members.

www.portatour.com/dynamics-crm/

More customer visits, fewer miles, more time

Are you spending more time in the car and planning than with the customer? Is it hard to put together **a meaningful itinerary** with all of your customers, ranked by priorities, honoring call frequency and scheduled appointments using a road map?

portatour[®] plans your trips within seconds at the push of a button, giving you back **valuable time** which would otherwise just be left on the road. Visit more customers, drive fewer miles.

Automatic itinerary planning cuts up to 25% of miles driven to customer locations, reducing fleet costs and CO₂ emissions. Especially new employees will be efficiently integrated into your company: You start on the first day in your new sales territory with optimized routes saving miles on the road.

The right customer at the right time

Reach your sales goals by focusing your work on important customers.

Use portatour[®] to visit A, B, and C customers in the right frequency. portatour[®] automatically selects which customers to call while also optimizing the driving route.

Customers with **high priority are included more often**, no customers are forgotten, letting you implement your sales strategy consistently and successfully.

Every customer is different: opening times, frequency of calls, planned holidays and duration of your visit can be maintained for each customer in Microsoft Dynamics[®] CRM and are individually included in portatour's[®] calculations.

Scheduled **appointments** from your calendar are guaranteed to be included in the schedule. Gaps in your calendar are efficiently filled by portatour[®] with suggested stops. This way, you'll visit the right customer at the right time.

Seamlessly integrated with Microsoft Dynamics® CRM

The portatour® solution integrates with Microsoft Dynamics® CRM and synchronizes your existing **accounts, contacts, leads and events** for route optimization. You won't have to worry about importing/exporting data to/from an isolated solution.

You can also enjoy the **benefits** of Microsoft Dynamics® CRM: Access possible from any web browser, centralised user management, individual access rights, customizable forms and low maintenance.

You are the ideal portatour® user

You...

- are active in the **field**
- plan your own tours
- serve more than 100 clients in your area
- visit at least 4 clients per day
- and spend 2 hours a day or more in the car.

You will come to value the help of portatour® in sales-route planning the more complex your planning needs are. This increases with the number of customers to be visited daily, with different frequencies according to customer importance and the restricted visiting hours at your customers' locations.

portatour® is suitable for any **size of business**: From a one-person company to large corporations with 1,000+ field staff. Users come from many different **industries**: Pharmaceutical, medical, food, industry, commercial equipment, cosmetics and many other sectors.

You decide the way you work

When does your **working day** start? Where do you start? Do you take breaks? How long do you work? portatour® takes your personal way of working into account.

Serve large areas with distant customers efficiently: portatour® plans intelligent tours with **overnight stays** to reduce long travel times. Your preferences, such as your favorite hotels or the days you want to stay home, are naturally taken into account.

Do you like driving fast on motorways? Let portatour® know, so you get schedules that fit your driving style. Add non-sales appointments to your calendar, too. Now you can **automatically reconcile** meetings at company headquarters, telephone conferences, private appointments at your doctor and other errands **with your customer visits**, saving you time and hassle.

The racing car of route planners

Drive the racing car of route planners. At just the push of a button, portatour® puts together an optimized schedule within **seconds**.

portatour® takes its processing power from the portatour® server farm which brings together many **high-performance servers** that provide a multiple of performance compared to laptop or smartphone processors.

You can calculate schedules for up to **28 days**. Out of millions of possibilities, the portatour® algorithm provides a **mile-optimized** proposed schedule with up to **125 client visits** intelligently selected from your customer database, which can hold up to **1,000 addresses**.

Your Assistant for Schedule Updates

You know as well as anyone: no matter how well planned a schedule is, **unplanned changes** happen in the course of the day: waiting times at customers', contacts who don't show up or who don't have time, urgent appointments that need to be squeezed in, not to mention traffic congestion; all of which can mess up a carefully planned schedule.

Now you can respond at the push of a button and portatour® will update your schedule for the rest of the day starting from your current location. You can customize your schedule at any time by dropping proposed visits or adding additional dates.

Get the overview

See all of your accounts, contacts and leads on a **map**. Where are customers who haven't been visited for a long time? What schedule is portatour® proposing for the coming days?

Take advantage of free time between appointments. Find **surrounding customers** who are open and stop in for a spontaneous visit.

Find your bearings with digital street maps that are updated regularly. The maps are **included** at no extra charge in portatour® – without having the hassle of third party licences.

Perfectly connected on the go

Good news for sales representatives with a preference for "light luggage": You can leave your laptop at home! Your mobile will be all you need for route planning in the future.

portatour® turns any **smartphone** into a personal sales-route planner that automatically synchronizes with Microsoft Dynamics® CRM. You can update your itinerary at any point during your day by just tapping a button. Mobile access to customer and appointment data with built-in call reporting are additional features of portatour®.

Use portatour® on any smartphone or tablet: Apple iPhone, iPad, Android, BlackBerry, Windows Phone, Samsung, HTC, Nokia and other manufacturers are supported. Just open the web browser and get started immediately – no installation of an app necessary.

Simple reports, Intelligent analysis

Log every customer call right after the visit ends at the push of a button on your mobile phone or tablet. This means you can clear your head and get ready for your next presentation; you also spare yourself the burdensome catching-up on reports late in the evening. The data entry form for **call reports** can be adapted to your personal needs.

Analyze your work with **portatour® Report**. Statistics about your area, your customers, frequency of calls will give you valuable information on how you can improve your strategy. In the long term you will also see how many visits per day you need to do to actually achieve your desired call frequency.

Start today

The installation in your Dynamics CRM can be done in **5 minutes**; your administrator can make all necessary configurations. You are ready to go within an hour. Later, you can easily install updates.

To ensure the smooth implementation of automated sales-route planning with portatour[®] in your business, please contact our **consultants** and **partners** who will help you with best practices to get you started.

How portatour® works

Products

portatour® is available in the following versions:

Anywhere - portatour® for the web

portatour® Anywhere runs in your web-browser on your desktop PC, notebook, tablet and smartphone. Create your account, upload customers, and start driving on your optimized sales-route today. You don't have to install anything, no need for extra software.

portatour® for Salesforce®

The portatour® app seamlessly integrates with Salesforce and Force.com applications and uses your existing accounts, contacts, leads and appointments in your calendar. The installation in your Salesforce organization via Salesforce AppExchange can be done in less than 15 minutes; your administrator can make all necessary adjustments on the first day.

portatour® for Microsoft Dynamics® CRM

For both on-premise and on-demand versions of Dynamics CRM 2011, 2013 and 2015, we offer a complete solution for synchronizing customers, contacts, leads and appointments between CRM and portatour®. Within 15 minutes, your administrator has installed and configured the app, users can access the full functionality of portatour® to make schedules and report calls as a webapp on their smartphones, tablets and notebooks.

portatour® Connector

portatour® brings your customer data to the road. Regardless of which ERP/CRM system you use, portatour® Connector gives your sales team access to all relevant data on their smartphone, tablet and notebook. Synchronization works in both directions. As part of an implementation project, portatour® Connector is installed in your IT landscape and adapted to your requirements. We offer standard configuration templates for SugarCRM, Oracle Siebel and Microsoft Dynamics CRM 4.

Frequently Asked Questions

How much do I save with portatour®? When is the return of invest?

Automated itinerary planning can save between 10–25% of the miles driven per customer visit, depending on your industry and region. portatour® usually pays for itself if you save 3% of your mileage costs or achieve an extra customer visit per month.

In addition, consistently using portatour's® proposed schedules will lead to a higher frequency of calls to important category-A customers and thus yield more revenue per visit. Customers with lower priority are visited less often, but not forgotten!

Create your [own return-of-investment calculation in the portatour® shop](#).

Will portatour® record the routes I drive?

No; portatour® does not store GPS records.

Can I use portatour® with Salesforce, Dynamics CRM or other CRM/ERP systems?

Yes, portatour® works with Salesforce, Microsoft Dynamics CRM 2011, 2013 and 2015, Siebel CRM, Sugar CRM and other CRM/ERP systems.

A customer calls and wants to have an appointment—how does portatour® react?

You can enter the appointment directly into portatour® or into Microsoft Dynamics® CRM. portatour® detects conflicts in your schedule and optimizes your itinerary to reflect the revised schedule. That way, you still have an optimized route even if your schedule changes.

Can portatour® help me avoid traffic jams?

Current traffic situation is not taken into account; use the navigation system of your vehicle or smartphone. portatour® can start your smartphone's navigation system at the push of a button.

Does portatour® help me win new customers?

Yes. Import your new customers with Microsoft Dynamics® CRM and portatour® calculates optimized route plans for you to reach new customers in the most efficient way in addition to attending to your existing customers.

Which uses cases is portatour® suitable for?

portatour® is used for field sales with regular client calls, one-time visits as part of a product launch, pricing and inventory control in outlets, mystery shopping, new customer acquisition, recurring service activities.

I'd like to get a demonstration of portatour®.

Would you like to present the sales-tour-planning software portatour® to your company? We are happy to prepare an online presentation for your management, sales management, IT management and key sales representatives, where we cater to your situation and answer individual questions. Contact us today.

Can I try portatour® without obligation or cost?

Yes. Sign up for a free trial of portatour® Anywhere, a web-version without further requirements. The trial license will automatically expire after 30 days and is limited to 2 field reps. There are no costs. You can also try an integration into the CRM of your choice.

Is portatour® for centralized or decentralized route planning?

For field sales, it's particularly important to respond to customer needs flexibly without having to adhere to any rigid, centrally planned schedules. portatour® is therefore a decentralised tour planner, i.e. the salesperson always plans his or her schedules independently and can optimize them dynamically by pressing a button.

Can I use portatour® for districting or geo-marketing?

No; portatour® is a sales-route planner and therefore requires an assignment of customers to sales representatives. For sales region planning, we work with partners proficient in geomarketing. We'll be glad to establish a contact to set up special terms in connection with portatour®.

Can I buy a perpetual portatour® license?

No – portatour® is a "software as a service" application. You subscribe to portatour® as a service and save yourself costs for server hardware, software, installation, maintenance and operation. portatour® is ready from the first day, is constantly updated, works on any device with a web browser and uses the computing power of the portatour® server farm. Depending on the number of users, you can choose between quarterly and annual payments.

Is there an offline version of portatour®?

portatour® is an online-web-application with support for offline data storage. In situations without internet connection, your most important data is readily available offline in your browser. portatour® is optimized for using a low bandwidth, as is typical for mobile use. Being a web-application, it removes the need for installation and updates on your mobile devices and leverages the computing power of the portatour® server farm for route-optimization.

For which industries is portatour® suitable?

portatour® is suitable for any size of business: From a one-person company to large corporations with 1,000+ field staff. Users come from many different industries: Pharmaceutical, medical, cosmetic, food, industrial and commercial needs, wholesale, collection agencies, toys, paper and stationery, merchandise, chemicals, paints and coatings, electronics, workshop supplies, craft supplies, car accessories, optics, drinks, food and beverage, tobacco, heating and sanitary, market research, mystery shopping, building services, sports and leisure goods, clothing and textiles, machinery, spare parts, materials, furniture and equipment, telecommunications, dental needs.

How do I get help and support for portatour®?

Once installed, the administrator and user manual can be found in Dynamics on the portatour® tab. The manuals are available in German and English and offer answers to frequently asked questions in addition to a complete description of the application. Our support team is also happy to help you via email.

How secure is portatour®?

portatour® uses the most advanced security standards: The communication between the device and portatour® servers is SSL encrypted; to gain access you need a username and password. The portatour® servers are protected by firewalls; data is stored on encrypted disks on multiple database servers. The data centre has biometric access control and video surveillance. We do not share your data with third parties. [More information on data security at portatour®.](#)

Is portatour® available 24/7?

portatour® is designed for high availability: Multiple redundant high performance servers with automatic load balancing and failsafes, 24/7-Monitoring with automatic alarm, redundant fiber connectivity to the Internet, redundant power supply, additionally UPS and diesel generator, redundant air conditioning and fire alarm system with smoke detection and extinguishing system.
